## ... label printers

### directly on the AS/400 or iSeries

*In half an hour a delivery note is transformed into a thermo transfer-label with barcodes...*

With InterForm it is now equally simple to design a label for a thermo transfer printer as a delivery note for a laser printer. Using the same operations as when defining the delivery note, InterForm is now capable of setting up and printing a label.

By using the same spoolfile InterForm ensures that the labels are printed at the same time and in the same order as the delivery notes. By using the number of pieces/packages stated on the delivery note, the system automatically generates the necessary number of labels.

Name and address of the receiver is formatted and written with the desired font, size and rotation. Symbols stating weight and dangerous goods are added according to given requirements.

#### Barcodes and Fonts

Data from the printout is translated to the requested barcode including placement and size. Further InterForm makes it possible that additional data can be printed using the company's preferred TrueType font from Windows.

#### Logo & Symbols

The Company logo and important symbols for weight and dangerous goods can be transferred in the print process or saved in the printers' flash-memory.

#### Language Control

One label can be supplied with text in different languages without conflicts between special characters in the individual language. This function is unique and only supported by InterForm.

#### Zebra-printers directly on the AS/400 or iSeries

InterForm supports an unlimited number of label printers of the type "Zebra", directly connected to the AS/400. No external hardware is required – the printers are connected directly to the AS/400 via Client Access or a LAN-interface.

#### Designing labels

Using InterForm it is possible to design labels centrally on the AS/400 for iSeries for all printers – with options for graphics, fonts, barcodes and symbols. Print-data can be reformatted and moved to the desired position on the label. All functions can be conditioned, meaning that the label design is dynamically changes to reflect print-data.

#### Stability

The merge and print function is done centrally on the system, which ensures the AS/400 and iSeries systems well known stability and eliminates further investments in external print servers.

## No changes in existing applications

It is not necessary to change the existing applications. A label design can be created based on any standard print-out from an existing ERP-solution, as long as the necessary data are present – if some data is occasionally missing, InterForm can find these by a SQL-look-up in the database.

## Get Started

Order a "get started day" using our motto "No cure - No pay".

Our consultant will set up and design one label according to your requirements and make the first label print ready for production. If you afterwards decide that you do not wish to use or purchase the InterForm/Zebra-solution, the arrangement will be free of charge.

## Hardware:

- Zebra-printers with support of the printer language ZPL2
- Support for Flash-memory in Zebra-printers for storing fonts, logo and symbols
- Individual printer control regarding:
  - Individual or connected labels
  - Thermo transfer or thermo media
  - Tear-off, Rewind, Peel-off and Cutter
- Connection via Client Access or LAN

## Software:

- Frames, horizontal, vertical and diagonal lines
- Text constants including font selection
- Job information like: (released 4 quarter)
  - \*PAGNBR, \*ENDPAGE, \*MUPPAGNBR
  - \*JOBNAME, \*USER, \*JOBNBR, \*JOB
  - \*PGM, \*PGMLIB,
  - \*OVERLAY, \*FILESET
- Tabulator and "Remap"
  - Text alignment, Change of font and rotation
  - Conditioned by spool data
- Conditioned and unconditioned sub clichés
- Cliché selector with conditioned cliché selection
- Set or variable copy control
- Built in scalable fonts
- Import of TrueType fonts from Windows
- Barcodes following the standards
  - PDF417
  - EAN8, EAN13, UPC-A,
  - Code 39, Code 128,
  - Interleaved 2 of 5
- Western and Eastern European character- set
- Graphics in 203/300 dpi TIFF incl. support of rotation
- Support of "black on white" and "white on black"

## The InterForm product line ...

InterForm is a complete solution for creating electronic forms on IBM AS/400 and iSeries:

### InterForm Security & Digital Signature

Encryption, password-protection and digital signing of PDF-documents on a high level.

### InterForm PDF Print

Printing PDF-documents directly from the AS/400.

### InterWord

Letter merge and text editing directly on the AS/400.

### InterFax

Sending and receiving fax directly on the AS/400.
