

InterExcel

Spool file conversion to Excel

Combine the flexible layout of the Excel spreadsheet with iSeries spooled data

InterExcel improves the Corporate Communication and Branding

InterExcel is an easy-to-use application that can convert an iSeries report into a MS Excel format (.xls), and place it directly on your desktop.

The functionality of InterExcel enables you to create professional looking reports and charts. Imagine the value of your iSeries data, when you can share it as a report or chart in the conference room or as an attachment to an email.

You select the reports to create from a simple menu, or request InterExcel to automatically setup your reports. You save time and money with InterExcel ability to automatically create professional looking reports with user-defined templates.

Formatting templates for individual spool files InterExcel enables the creation of templates, used for conversion of specific spool files, into formatted Excel files. These templates include settings of how and where data is placed in the Excel spreadsheet, including cell font and border definition. The settings also enable deletion of blank lines and multiple headers on every page for easy handling in MS Excel.

User friendly handling via a command, similar to WRKOUTQ. InterExcel400 enables easy selection of the spool files to be converted, through a command similar to WRKOUTQ. From this easy menu structure, the user can select which target format to be used for the conversion.

Automatic conversion via Program Calls. InterExcel features the possibility of calling the InterExcel400 conversion program from own menu structures or programs for batch conversion. InterExcel enables dynamic naming of the saved InterExcel files, resulting in increased freedom when dealing with batch conversion of reports.

Using Excel "Import text wizard" InterExcel features opening Excel with a text file, which will make it possible to use the MS Excel "Import Text Wizard". This gives the user complete independence which spool file to process.

- Easy-to-use
- Share Excel reports with non-iSeries users
- Be independent of static iSeries reports
- Flexibility in generation of user-defined Excel reports
- Improve corporate communication and branding with professional looking documents

Conversion to .txt and .rtf format.

InterExcel enables conversion to .txt format, thus also calling of the associated PC program like Notepad, Works or Word. When converting to .rtf format, MS Word will be called, and the respective page breaks are respected, as opposed to using .txt.

Integrates to InterForm.

InterExcel enables InterForm users to expand the number of output formats for the distribution of documents. The InterForm e-mail distribution feature will facilitate easy distribution of Excel reports via e-mail.

The InterForm product line ...

InterForm is a complete solution for creating electronic forms on IBM iSeries and Power Systems i:
