

InterForm

System i5

Design and manage all your electronic forms

With InterForm you can handle an unlimited number of processes and printers simultaneously. The combination of splitting, sorting and merging spooled files in conjunction with the close integration to additional printer functions makes this an outstanding electronic forms solution.

For the Volvo organization, InterForm is more than an electronic forms system – it is a strategic solution that handles the entire paper flow for every Volvo Truck Dealer in Europe, managing over 1,000 printers for more than 6,500 users.

GF insurance uses InterForm to comply with legislative demands that require the company to provide all customers with an annual overview. The yearly print job totals 600,000 pages consisting of individual insurance policies and accompanying letters.

Twice a year, NCB, the Nordic Copyright Bureau, prints more than 1 million pages with airplay listings for artists in Scandinavia and the Baltic countries. The individual statements can also be viewed on the Internet as PDF documents created by InterForm.

System & Method

In the daily Workflow

www.system-method.com

Flexible design

- Graphical designer function enables easy creation of conditional elements and remapping of data
- PDF documents created with digital signatures, password protection, bookmarks and hyperlinks
- Support of all languages and character sets with Unicode, true type fonts and barcodes
- Built-in PCL and PDF driver handles JPEG, BMP and TIFF files

Automated workflow

- Central management controls output queues and activates workflow
- Distribution as PCL to designated printers or electronically as PDF documents
- One single process separates spooled files, captures index data and archives as PDF documents

Easy integration

- Native iSeries application – no additional hardware or IBM features required
- No need for changes to the ERP system
- Integration with DB/2 database enables automatic distribution via print, fax or email
- Advanced Mail Merging capabilities on iSeries incl integration with Microsoft Word
